## Rhiannon's Reading Recommendations

### Week three

#### Miss Rafferty's Book Recommendations!

So, Miss Rafferty has been wanting to read the boy in the striped pyjamas for a while and she forgot it was on her list of books to read so when Miss Rafferty saw Rhiannon's recommendations, she ordered it and it came the other day and she is absolutely hooked!!! She is on chapter 8 and it is just absolutely brilliant!!

I love that Rhiannon is now inspiring teachers to read <3

Aafreen in Y8 has been using BorrowBox a reading app that you can download on your phone.

To set up an account you have to use the barcode off your library card and your library pin, then select you local library. You can search for authors to find a book and make reading lists for books you want to read. You can borrow and reserve eBooks and eAudiobooks.

She hopes many of you enjoy the app as much as she does.

#### Mrs Francis' Book Recommendations!

Mrs Francis grew up in the 70's and 80's so there wasn't much to do other than read! She loved books as a child and could always be found in the local library at weekends. As a young teenager she discovered the books of Agatha Christie. Her favourite is Murder on the Orient Express, as she managed to work out who the murderer was before Hercule Poirot! She now loves to read a good thriller novel especially Harlan Coben, CL Taylor and Rachel Abbott. However, she still enjoys re-reading the Christie novels over again.

#### Mrs Waterhouse's Book Recommendations!

As a child, Mrs Waterhouse loved Roald Dahl, Enid Blyton and then later in life, J.K Rowling. Roald Dahl fiction never seems to get old in Mrs Waterhouse's eyes and her favourite is still 'Matilda'. David Williams has done a brilliant job of filling a 'Roald Dahl' gap in young fiction. Mrs Waterhouse's favourite of his is 'The Midnight Gang'.

Any books by and Anne Cassidy are also recommended. These are teen fiction novels and everyone Mrs Waterhouse has read, she has loved. 'Looking for JJ' is an obvious classic that lots of pupils will have read, but she thinks that her favourite is the 'Dead House'. Again, these books are aimed at an older read. Please don't blame Mrs Waterhouse if you have nightmares!

Mrs Waterhouse's favourite 'adult' author at the moment is Mark Edwards. These books are from the thriller genre and she doesn't think she has read a poor title of his. Mrs Waterhouse's favourite is 'Follow you Home'. Again, quite a dark and scary but just what she likes from a book

#### Mr Kelsall's Book Recommendations!

Alan Turing by Maria Isabel Sanchez Vegara and Ashling Lindsay

There isn't **lots** of choice for books in the subject 😊 it seems like the idea of coding, computers, and algorithms don't always show people how much creativity the subject holds; beautiful prose and efficient code are almost opposite in structure, so people don't see the beauty in code. For less confident readers the life stories of Alan Turing and Ada Lovelace from the Little People Big Dreams series are amazing; people have largely forgotten about them until recently but the impact they had on all our lives due to their work as early computer scientists and mathematicians is difficult to articulate. For less confident readers who want to learn about coding Josh Funk and Sara Pelacois has written two good picture books, How to Code a Sandcastle and How to Code a Rollercoaster

Ada Lovelace by Isabel Sanchez Vegara and Zafouko Yamamoto

# Maths Challenge

The Bugatti Veyron 16.4 Super Sport produces 1184hp and has a 0 - 60 time of 2.6 seconds.

The Tesla Model 'S' produces 735kW and has a 0 - 60 time of 2.28 seconds.

But which produces the most power?

Outstanding achievements made this week in Maths!!

## Maths Challenge

If I convert to Horse Power  
 $746w = 1 \text{ hp}$       $735,000 \div 746 = 985.3\text{hp}$  (Tesla hp)

Or  
 If I convert to kW  
 $1184 \times 746 = 883,264w = 883kW$  (Bugatti kW)

So even though the Bugatti produces more power, it is slower up to 60mph. However the top speed of the Tesla is around 200mph and the Bugatti is around 260mph.
